Match Remote Control (two match ways)

The touch panel controller can also match with the RF remote (optional).
End user can choose the suitable match/delete ways. Two options are offered for selection:

Use On/Off key

Match:

Turn on light, turn off, immediately press the On/Off key of the panel for 5s,
then press on/off key (single zone remote)
or zone key (multiple zone remote) of the RF remote within 5s.
The LED indicator fast flash 3 times means match is successful.

Delete:

Turn on light, turn off, immediately press the On/Off key of the panel for 10s,
delete all matched RF remote.
The LED indicator fast flash 6 times means all matched remotes were deleted.

Use Power Restart

Match:

Switch off the power, then switch on power, repeat again,
immediately short press on/off key (single zone remote)
or zone key (multiple zone remote) 3 times on the remote.
The light blinks 3 times means match is successful.

Delete:

Switch off the power, then switch on power, repeat again,
immediately short press on/off key (single zone remote)
or zone key (multiple zone remote) 5 times on the remote.
The light blinks 5 times means all matched remotes were deleted.

● T1 Single color panel

Turn on/off light.

Brightness wheel.

Brightness+, 10 levels.

Brightness-, 10 levels.

4 scenes, short press recall the scene, long press 5s save current brightness into scene 1/2/3/4.

● T2 Dual color panel

Turn on/off light.

Three color temperature switching (warm white, natural white, cool white)

Brightness +, 10 levels.

Brightness -, 10 levels.

Color temperature wheel.

4 scenes, short press recall the scene, long press 5s save current brightness into scene 1/2/3/4.

● T3 RGB panel

Turn on/off light.

Color wheel.

Brightness, 10 levels.

Adjust dynamic mode speed, 10 levels.

Short press play 10 built-in dynamic mode, long press 2s run mode-cycle.

● T4 RGBW panel

Turn on/off light.

Color wheel.

Adjust dynamic mode speed or static color brightness, 10 levels.

Short press play 10 built-in dynamic mode, long press 2s run mode-cycle.

Short press get red, green, blue, white color, long press adjust each color brightness.

4 scenes, short press recall scene, long press 5s to save the current color into scene 1/2/3/4.

Note: After touch power key to turn off light, long press power key for 5 seconds will turn on or turn off tone(T1,T2 without key tone).

Scene locking:

- Scene keys can be set to locked state, cancel long press for 5 seconds to save the scene function (default scene is not locked).
- Short press the panel on/off key, turn on the light first, then turn off the light, immediately long press the panel on/off key for 5 seconds, then immediately long press any one scene key for 5 seconds to set all scene keys to locked state.
- Short press the panel on/off key, turn on the light first, then turn off the light, immediately long press the panel on/off key for 5 seconds, then immediately long press any one scene key for 10 seconds to restore all scene keys to unlocked state.

Wiring diagram

T1 Single color panel

DIP switch select four PWM frequency: 1KHz, 2KHz, 8KHz or 16KHz.
Higher PWM frequency, will cause lower output current, higher power noise, but more suitable for camera(No flickers for video).

T2 Dual color panel

DIP switch 1 select two PWM frequency: 2KHz or 8KHz.
Higher PWM frequency, will cause lower output current, higher power noise, but more suitable for camera(No flickers for video).
DIP switch 2 select color temperature output mode: NW=50%WW+50%CW or NW=100%WW+100%CW.
