Wiring Diagram

- Connect with 0/1-10V dimming driver (no use dry contact output)

- Connect with 0/1-10V dimming driver (use dry contact output)

Note:

We recommend the number of LED drivers connected to 0/1-10V dimmer does not exceed 20 pieces, The maximum length of the wires from dimmer to LED driver should be no more than 50 meters.

Operation

Set 0/1-10V output mode

Switching 0-10V or 1-10V output mode via the DALI master software interface.

DALI address assigned by DALI masters

DALI address can also be assigned by DALI Master controller automatically.

Please refer to user manuals of compatible DALI Masters for specific operations.
